

FAMILY FOUNDATIONS HOME VISITING

ECAC Update
December 3,
2014

FAMILY FOUNDATIONS HOME VISITING

- Is a **voluntary** program offering family supports and coaching to parents and their children (birth to age 5) during and after pregnancy
 - Weekly or bi-monthly visits from a **qualified provider** (nurses, parent educators, family support workers)
 - Focus on prenatal care access, promotion of positive parent-child relationships, healthy child development, screenings, assessments, and referrals for additional supports
- Supports the implementation of 4 evidence-based home visiting models with **proven results**
 - Early Head Start
 - Healthy Families America
 - Nurse Family Partnership
 - Parents as Teachers

FAMILY FOUNDATIONS HOME VISITING

- Along with federally-funded home visiting programs in other states, is working to **improve outcomes** in 6 target areas:
 - Improved maternal and child health
 - Prevention of child injuries, child abuse, neglect and maltreatment
 - Increased school readiness and achievement
 - Reduced domestic violence
 - Improved family economic self-sufficiency
 - Greater coordination and referrals for other community resources and support

FFHV SUMMARY STATISTICS

APRIL 1, 2014 THROUGH SEPTEMBER 30, 2014

Households Served: 1,050

Ethnicity	Number of Adult and Child Clients	Percentage of Clients
Hispanic or Latino	362	23.5
Not Hispanic or Latino	1,178	76.5
Total	1,540	100.0

Race	Number of Adult and Child Clients	Percentage of Clients
American Indian, Native American or Alaska Native	166	10.8
Asian	27	1.8
Black or African American	450	29.2
Hawaiian or Pacific Islander	1	0.1
White	661	42.9
Other	80	5.2
Unknown	68	4.4
More than One Race	87	5.6
Total	1,540	100.0

RISK FACTOR FREQUENCY

APRIL 1, 2014 THROUGH SEPTEMBER 30, 2014

- Caregivers newly enrolled in home visiting during reporting period (n= 304)
- 57.2% report 3 or more risk factors

Priority Population/Risk Factor	Percentage
Low income	96.7
Tobacco users in home	44.9
At risk for low academic achievement	42.5
Pregnant woman under age 21	33.6
History or child abuse/neglect or interactions with child welfare as child or adult	23.6
History of substance abuse	23.6
Have child with developmental delays	15.3
Family members serving or formerly served in Armed Forces	7.3

FFHV DATA DASHBOARD

DRAFT Family Foundations Home Visiting State Performance Dashboard November 2014						
Goal Areas	Measure Number	Measure Description	Baseline ¹	Oct 2013 - Mar 2014	Apr 2014 - Sep 2014	Baseline % Change
Family Recruitment and Retention	1	Percent of target number of families enrolled in home visiting services		XX.X%	XX.X%	
	2	Percent of households enrolled prenatally	XX.X%	XX.X%	XX.X%	-X.X% ↓
	3	Household retention rate at 6 months post-enrollment	XX.X%	XX.X%	XX.X%	-X.X% ↓
Improve Maternal and Newborn Health	4	Percent of children receiving at least 4 out of 5 recommended well-child health exams in first 6 months of life	XX.X%	XX.X%	XX.X%	+X.X% ↑
	5	Percent of mothers screened for depression between 14 and 60 days postpartum	XX.X%	XX.X%	XX.X%	+X.X% ↑
Reduce Child Injuries, Maltreatment and Emergency Room Visits	6	Percent of children with 1 or more visits in the first year of life	XX.X%	XX.X%	XX.X%	-X.X% ↓
	7	Percent of children with substantiated maltreatment report in the first year of life	XX.X%	XX.X%	XX.X%	+X.X% ↑
Improve School Readiness and Achievement	8	Percent of children, 24 months, with an ASQ-3 developmental screening score indicating a potential concern who received a referral for services	XX.X%	XX.X%	XX.X%	-X.X% ↓
Identify and Address Domestic Violence	9	Percent of mothers screened for domestic violence within 60 days of enrollment	XX.X%	XX.X%	XX.X%	+X.X% ↑
Increase Family Economic Self-Sufficiency	10	Percent of households with an increase in income/cash support after 12 months of home visiting services	XX.X%	XX.X%	XX.X%	+X.X% ↑

¹ Baseline data period is October 1, 2012 through September 30, 2013. Baseline data were drawn from the Family Foundations Home Visiting Programs's 2nd Annual Federal Benchmark Report or from raw data exported for that report.

For measures with target values:

- meets or exceeds target value
- ▲ within 20 percentage points of target value
- ◆ more than 20 percentage points from target value

For measures with target directions, compared to previous reporting period:

- ▲ VALUE moving in target direction
- ▲ VALUE moving away from target direction by 20 percentage points or less
- ▲ VALUE moving away from target direction by more than 20 percentage points or in 2 or more consecutive reporting periods

HOME VISITING ENHANCES EARLY CHILDHOOD SYSTEM

- Collaborative Planning and Systems Building
- Identification, Screening, and Referral
- Professional Development
- Quality Improvement
- Evaluation

SUMMARY: FFHV IMPACTS

- FFHV programs are serving high-risk prenatal and parenting families in their communities.
- Since 2012-2013, FFHV programs have demonstrated:
 - More children are receiving their well-child visits on time;
 - More mothers are screened for postpartum depression and domestic violence and receiving referrals when appropriate;
 - Fewer children are visiting the emergency room for illnesses and injuries.
- FFHV continues to invest in the professional development of home visitors and employ CQI methodology towards the goal of improved outcomes for children and families.
- The effectiveness of FFHV programs is being evaluated by researchers from UW-Milwaukee and UI-Chicago, including a randomized control trial of the largest FFHV program in Milwaukee; three additional programs are participating in a national evaluation of home visiting effectiveness.
